**Physical Education (PE) is an important component in our schools' curriculum, from primary to middle school. The overall objective of the subject is to equip our students with the knowledge, skills and attitude to lead a physically active and healthy lifestyle throughout their life.**

In grades 2–3 Physical Education, students develop fundamental motor skills, coordination, and balance through a variety of fun and engaging activities. Lessons focus on teamwork, sportsmanship, and following rules while participating in individual and group games. Students learn the basics of fitness, including stretching, endurance, and strength-building exercises appropriate for their age. Movement activities integrate skills such as throwing, catching, jumping, and running. The course fosters a lifelong appreciation for active living and healthy habits. Students will also experience the fundamental skills needed to play various sports including, volleyball, basketball, baseball, and football.

Students will also be taking a fitness test in the beginning and the end of the school year.

Students will be having P.E. classes twice a week. They are expected to give their best effort while participating in all activities, display respect and sportsmanship towards fellow classmates, learn rules and regulations for all activities, and to be properly dressed (P.E. uniform).

**Uniform:**

Students may come to school dressed in their PE uniform.

**Grading Policy**

Grading will be based on active participation and skill development. A separate conduct grade will be given for behavior.

**Attendance**

Students must bring in a doctor/parent note to excuse them from P.E. classes.
